25X1X

No aircraft were parked at the Rangsdorf (N 53/2 82) airfield. Boundary lights were being dismantled along the railroad line on the eastern edge of the field. The noise of running combustion engines, with frequent misfiring and delayed ignition, probably aircraft engines, was repeatedly heard in the afternoon from the Buecker Plant at the north corner of the field, which was surrounded by four occupied guard towers. The longest uninterrupted running time was twenty minutes.

25X1A

[REDACTED] according to which an engine test stand is at the field. It is assumed that a repair unit for aircraft engines is stationed in Rangsdorf. No air unit is at the field.

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
